

MOHAMMAD ABUHAMMAD

IT Operations Specialist

Amman, Jordan | mohdabuhammad1@gmail.com | +962 79 636-4398 | linkedin.com/in/mohd-abuhammad

PROFESSIONAL SUMMARY

Results-driven IT Operations, Network, and Security Engineer with 3 plus years of experience in enterprise IT infrastructure, endpoint management, and security operations. Skilled in deploying and remediating endpoint security solutions including CrowdStrike Falcon and Cortex XDR across large-scale Windows environments. Proficient in PowerShell scripting and automation for bulk system administration, software deployment, and compliance enforcement. Experienced with endpoint management platforms including BigFix, ManageEngine Endpoint Central, Microsoft SCCM, and Microsoft Intune. Hands-on experience with Microsoft 365 administration, Microsoft Azure, Azure Active Directory (Entra ID), and on-premises Active Directory management. Familiar with AI automation, AI agent development, and software development concepts. Proven ability to reduce ticket volume through root cause analysis and proactive remediation.

TECHNICAL SKILLS

Endpoint Management: BigFix, ManageEngine Endpoint Central, Microsoft SCCM, Microsoft Intune, Software Deployment, Patch Management, OS Imaging, Compliance Monitoring

Endpoint Security: CrowdStrike Falcon, Cortex XDR, Endpoint Detection and Response (EDR), Vulnerability Remediation, BitLocker Encryption Management

Systems Administration: Windows Server, Active Directory (AD), Group Policy (GPO), DNS, DHCP, Domain Services, Azure Active Directory (Entra ID), Microsoft 365 Administration, Exchange Online, User Account Lifecycle Management

Cloud and Identity: Microsoft Azure, Azure AD / Entra ID, Microsoft 365 Admin Center, Conditional Access Policies, Single Sign-On (SSO), Multi-Factor Authentication (MFA)

Scripting and Automation: PowerShell (Advanced), Bash, Bulk Operations Scripting, Scheduled Task Automation, WMI/CIM Remoting, Remote Execution (PsExec, WinRM)

AI and Automation: AI Agent Development, AI Workflow Automation (n8n), Chatbot Development, API Integration, Prompt Engineering

Networking and Security: TCP/IP, VLANs, Firewall Configuration, Network Security, VPN, SNMP, Network Monitoring, Wireless Networking

Software Development: Software Development Lifecycle, Database Management (MySQL, PostgreSQL, SQLite), Docker, Git Version Control, VPS Hosting and Deployment

IT Service Management: ITIL Practices, Ticketing Systems, SLA Management, Incident Management, Problem Management, Root Cause Analysis, Change Management

Tools and Platforms: Solve Now, Freshdesk, Microsoft 365 (Outlook, Teams, SharePoint, OneDrive), Remote Desktop, IT Asset Management Systems

PROFESSIONAL EXPERIENCE

IT Operations Specialist

Concentrix | Amman, Jordan | October 2025 - Present

- Manage day-to-day IT operations ensuring stability, security, and availability of endpoint systems across multiple sites in the EMEA region.
- Deploy operating system updates, security patches, and third-party application updates using BigFix and ManageEngine Endpoint Central, maintaining compliance with corporate and security standards.

- Administer and monitor CrowdStrike Falcon and Cortex XDR management consoles, including endpoint agent health monitoring, sensor troubleshooting, update management, and security alert response.
- Administer Microsoft Azure Active Directory (Entra ID) and on-premises Active Directory for user provisioning, access control, group policy management, and security enforcement across the organization.
- Manage Microsoft 365 environment including Exchange Online, Teams, SharePoint, and OneDrive administration, license assignment, DLP policies, and user onboarding/offboarding workflows.
- Utilize BigFix for automated endpoint compliance checks, software distribution, Fixlet deployment, patch management, and real-time endpoint visibility across hundreds of managed devices.
- Manage endpoints through Microsoft SCCM and Microsoft Intune for application deployment, OS updates, device compliance policies, MDM enrollment, and remote device management.
- Develop and maintain advanced PowerShell scripts to automate software deployment, agent remediation, bulk Active Directory operations, compliance reporting, and endpoint troubleshooting across the fleet.
- Investigate and resolve endpoint vulnerabilities including security agent conflicts, tamper protection issues, BitLocker encryption state management, and driver-level conflicts between EDR solutions.
- Analyze incoming support tickets to identify recurring issues, implement permanent fixes, and reduce overall ticket volume through root cause analysis and proactive remediation.
- Collaborate with Network, Security, and System Administration teams to troubleshoot complex cross-functional issues and implement infrastructure improvements.
- Review deployment logs, system metrics, and security reports to identify root causes and apply corrective and preventive actions.

Corporate IT Executive

Aramex International - Global Support Office | Amman, Jordan | August 2023 - October 2025

- Provided end-to-end technical support to corporate staff, resolving hardware, software, and network issues to minimize downtime and ensure business continuity.
- Managed IT support tickets from creation to resolution, ensuring accurate logging, categorization, prioritization, and closure within agreed SLAs using ITIL-based processes.
- Administered user accounts and access control across Active Directory, Microsoft 365, and enterprise applications, managing provisioning, modification, deactivation, and role-based permissions.
- Deployed applications, managed software updates, and automated patch deployments using Microsoft SCCM, ensuring system compliance and secure performance across endpoints.
- Managed endpoint devices using Microsoft Intune for mobile device management (MDM), policy enforcement, conditional access, application deployment, and corporate data protection.
- Administered Microsoft 365 services including Outlook, Teams, SharePoint, and OneDrive, managing mailboxes, distribution groups, permissions, and license assignments.
- Planned and executed IT projects including system upgrades, migrations, and infrastructure improvements in coordination with cross-functional teams.
- Performed routine endpoint hardware maintenance including diagnostics, hardware upgrades, component replacements, and performance optimization for laptops and desktops.
- Collaborated with procurement, vendor management, compliance and risk, and accounting teams to align IT initiatives with organizational goals and ensure regulatory adherence.

Product Promoter - Fiber Internet Service

Electronic Service Co. (ESCO) - Zain Company | Amman, Jordan | April 2022 - August 2023

- Achieved top seller status in multiple months through effective customer engagement, technical product knowledge, and consultative selling approach.
- Provided detailed technical explanations of fiber internet services to customers, addressing Wi-Fi interference, coverage optimization, and network performance comparisons.
- Maintained customer relationships through post-sale follow-up, providing ongoing technical support and ensuring satisfaction and retention.

PROJECTS

AI-Powered Social Media Chatbot Automation

- Designed and developed an AI automation system using AI agents for automated customer engagement and conversational chat management across social media platforms.
- Integrated large language model APIs with chatbot frameworks to handle natural language conversations, lead qualification, and customer support workflows.
- Implemented automated response pipelines with context-aware messaging, escalation logic, and multi-platform deployment capabilities.

Active Directory Automation via Telegram and WhatsApp

- Built a production-ready AI automation system using n8n workflow engine and PowerShell for natural language Active Directory management through Telegram and WhatsApp messaging bots.
- Enabled IT administrators to perform AD operations including user lookup, password reset, account unlock, and enable/disable via conversational commands from mobile messaging platforms.
- Implemented security hardening measures including chat ID allowlists, shared secret authentication headers, input sanitization, and NSSM-based service persistence.

PowerShell Automation Suite for Enterprise IT Operations

- Developed bulk Active Directory automation scripts for mass PC account creation, organizational unit placement, and remote domain join operations across hundreds of bare machines using WMI, PsExec and WinRM.
- Built bulk password reset automation scripts for Active Directory user accounts with comprehensive logging, error handling, retry logic, and compliance reporting.
- Created advanced CrowdStrike Falcon sensor remediation scripts implementing a state-machine approach with Safe Mode chaining, RunOnce registry persistence, BitLocker decrypt and re-encrypt workflows, and tamper protection bypass for complete sensor reinstallation.
- Developed Cortex XDR agent cleanup and reinstallation scripts with automated tamper protection handling, filter driver removal, and multi-pass XdrAgentCleaner routines for successful redeployment.
- Built BigFix client remediation orchestration scripts for remote bulk uninstall and reinstall operations with service-state polling, retry logic, and relay verification across the managed fleet.

Smart Water Tank Monitoring System (IoT)

- Designed and implemented an IoT-based smart water tank monitoring system using ESP8266 microcontrollers for real-time water level measurement and automated pump control.
- Developed a real-time Firebase database backend integrated with a custom Android application for remote monitoring, alerts, and manual override capabilities.

EDUCATION

Bachelor of Engineering - Computer Network and Security Engineering

Jordan University of Science and Technology (JUST) | Irbid, Jordan | 2018 - 2023

CERTIFICATIONS

- CCNA (Cisco Certified Network Associate) - Cisco - Course Completed
- NSE 1 Network Security Associate - Fortinet - Certified
- NSE 2 Network Security Associate - Fortinet - Certified
- Network Defense Essentials (NDE) - EC-Council - Certified
- Ethical Hacking Essentials (EHE) - EC-Council - Certified

LANGUAGES

Arabic: Native | **English:** Professional Working Proficiency (Writing, Speaking, Reading)

VOLUNTEER EXPERIENCE

- Owner and Team Leader - Hemam Society Team
- Team Leader - Kahrabji and NES Academic Team
